DETAILED ACTION

- I. Rejection of claims 35,36,38-59 under 35 USC 112, 1st will not be maintained in light of amendment filed 11/28/06. Applicant has support for employing "water-base" in the claims since suspension concentrates A-E on pages 8-9 of the specification all contain water.
- II. Rejection of claims 35,36, and 38-59 under 35 USC 103(a) as being obvious over Murphy will be maintained for reason on record and reason as follows.
Claims 72 and 73 are added to this rejection.
 - A. Applicant argues:
 1. The instant invention does not contain oil. Murphy teaches oil based compositions rather than water-based compositions as instantly claimed. The instant invention contains ethoxylated castor oil. Examiner has argued that ethoxylated castor oil is an oil. However, Applicant argues that ethoxylated castor oil is not an oil and for this reason instant invention does not contain oil(s). Applicant also provides exhibit B describing the properties of Cremophor EL (an ethoxylated castor oil) as forming a clear solution in water. Base on this property, Cremophor EL would not be considered an oil since oils do not form solutions in water, but instead form a separate layer when mixed with water. In conclusion all of the instant compositions are made without oil.

2. The adjuvant compositions taught by Murphy include modified organosilicone and an oil carrier as the two main ingredients. The adjuvant compositions were prepared without water. Thus Murphy's adjuvant compositions are oil based.
3. Murphy example compositions do not contain an active (examples 2-6) and therefore it remains unknown whether the spreading effect would have any significant effect on herbicidal activity under practical conditions.

B. Examiner argues:

4. The instant claims employ "comprising" language and therefore the oil(s) as well as other ingredients taught in Murphy are not excluded from the claimed invention. Examiner agrees that ethoxylated castor oil (Cremophor EL) would not be considered an oil since it forms a solution once combined with water. However it is reiterated that the "comprising" language employed in the instant claims does not exclude the presence of oils being employed therein and for this reason the oils taught by Murphy including oil and modified organosilicone would read on the instant claims. With respect to Murphy's examples not containing actives, it is not required that Murphy provide exemplifications of all possible compositions. However, from the reading of Murphy it is suggested that his oil containing compositions can comprise actives such as herbicides

(desmedipham). See abstract, column 4 lines 7-17. In the absence of unexpected results it would not be believable on its face that the spreading effect would not have any significant effect on the herbicidal activity under practical conditions since Murphy suggests the spreading effect would effect the (pesticidal (herbicidal) activity. In addition, examiner disagrees with Applicant in that Murphy's compositions do not contain water since Example 6 in Murphy employs water for the agricultural oil composition.

- III. Claims 37,60-71 are allowable for reason(s) on record in office action dated 6/28/06.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
